expansion

CHASE2QUAD

SNMX Pressed Insert Expansion

KEY POINT

TaeguTec now expands SNMX pressed inserts in the CHASE-2-QUAD series.

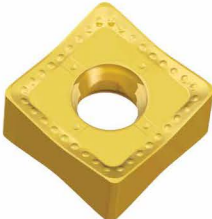

The CHASE-2-QUAD series comprises four insert types for different entering angles, covering a wide range of applications. SNMX pressed inserts are an economical option and feature precise, optimized cutting edges enabled by TaeguTec’s latest press-forming technology, delivering excellent machining performance and high productivity.

TaeguTec now expands the SNMX lineup with the ML chipformer and various corner-radius inserts, offering more choices suitable for diverse materials and operations.

※ According to our product operation policy, existing SNGX (ground) inserts will transition to SNMX (pressed) and then be phased out in stages.

For additional inquiries, please contact the product manager.
